# SHARDLOW

### Rural District Council

## ANNUAL REPORT

For the Year 1925.

SYDNEY HUNT, M.R.C.S. (Eng.) L.R.C.P. (Lond)., MEDICAL OFFICER OF HEALTH.

DERBY.

J. H. HALL & SONS, LTD., PRINTERS, GREEN LANE WORKS.

# To the Chairman and Members of the Shardlow Rural District Council.

GENTLEMEN,

I have pleasure in presenting the Annual Report for the year 1925.

The Report is arranged according to the instructions of the Ministry of Health, and a survey of the progress of measures taken for the improvement of the health of the District during the preceding five years is included.

The Birth-rate again shows a fall from 19.62 per 1000 of the population to 18.43 per 1000. The Death-rate shows a slight fall viz.:— from 10.69 to 10.42 per 1000.

The Infant Death-rate has risen from 59.2 per 1000 to 62.1. This however is well below the average for the County.

I am indebted to the Sanitary Surveyor, Mr. Forman, the Clerk, and other Officers of the Council for their unfailing courtesy and assistance throughout the year.

I am, Gentlemen,
Yours obediently,
SYDNEY HUNT.

# Measures taken for the improvement of the health of the District during the 5 years ending 1925.

The chief measures undertaken have been:—

(1) Sewerage Schemes for the following Parishes:-

Little Eaton,
Stanley and Stanley Common,
Ockbrook and Borrowash.

These have all been completed.

(2) Housing.

The Council have built 228 houses in the District.

File Lotter of 24 4. 21

tones

In addition 383 houses have been built with the assistance of the Subsidy.

Measures commenced but not completed:—

#### Water.

A scheme for a water supply from the Derwent Valley Water Board for the Parishes of

Ockbrook and Borrowash

Draycott

Breaston

Elvaston

Thulston

Shardlow

Chellaston

#### Measures under contemplation:—

- (1) Water supply for Sawley from the Long Eaton Main.
- (2) Water Supply for Kirk Hallam from Ilkeston.
- (3) Sewerage Scheme for Chaddesden and Water Supply from the Derby Main.
- (4) Water supply for Dale Abbey from the Derwent Valley Scheme.

#### Natural & Social Conditions of the Area.

Area (in Acres)—43,135.

Population (1921 Census)—33,755.

(1925, estimated)—34,080.

Number of Inhabited Houses (1921)—7,799.

Number of Families or separate occupiers (1921)—8,051.

Rateable Value—£216,533.

Sum represented by a Penny Rate—£902.

#### Physical Features and General Character of the District.

THE SHARDLOW RURAL DISTRICT lies in the South-Eastern Extremity of the County, and surrounds the Borough of Derby, except on its North-West Boundary. It almost surrounds the small Urban District of Alvaston, and touches the Urban Districts of Long Eaton and Ilkeston on the East and North-East respectively.

The Northern portion is somewhat hilly, the altitude varying from 300 to 450 feet above sea-level. In the Valley of the Trent and Derwent, it is flat, again rising to about 250 feet at Melbourne, and 400 at Derby Hills.

The Principal Industries are Agricultural, Coal Mining (West Hallam, Stanley, Dale Abbey), Lace Making (Sandiacre, Sawley, Breaston, Draycott, Melbourne), Cotton Doubling (Borrowash, Draycott,) Iron Founding (Stanton-by-Dale, Sandiacre), There are also Boot Factories at Melbourne, Paper Mills at Little Eaton, Colour Works at Spondon, Engineering Works at Normanton, and Gypsum at Chellaston.

The L.M.S. Railway and the Artificial Silk Works of the British Celanese Co. find employment for a large number of people residing in the District.

Geological Formation.—The principal formations are as follows:

Alluvium.—Barrow-on-Trent, Elvaston, Shardlow, Sawley, Swarkestone, Ratcliffe, parts of Kingston, and Little Eaton.

New Red Marl.—Aston, Breaston, Chaddesden, Chellaston, Littleover, Normanton, Borrowash, Ockbrook, Risley, Hopwell, Spondon, and part of Draycott and Kingston.

Keuper Sandstone.—Weston-on-Trent, Hopwell, Ockbrook.

Bunter Sandstone.—Sandiacre, part of Dale Abbey.

Middle Coal Measures.—Kirk Hallam, West Hallam.

Lower Coal Measures.—Stanton-by-Dale, Stanley, Dale Abbey.

Millstone Grit.—Melbourne, King's Newton, Stanton-by-Bridge.

Melbourne Grit and Schales.—Breadsall, Part of Little Eaton.

#### Vital Statistics.

#### General Provision of Health Services in the Area.

1. Hospitals provided or subsidised by the Local Authority or by the County Council.

#### Hospitals provided by the Local Authority:-

- (a) Draycott Isolation Hospital; 35 beds for Scarlet Fever & Diphtheria. This is under the control of a Joint Committee for Shardlow, Long Eaton, and Alvaston.
- (b) Long Eaton Meadow Lane Hospital for Small Pox.

  Arrangements have been made for the treatment of
  Small Pox patients with the Long Eaton Authority,
  20 beds are available.
- (c) Arrangements are made with the Derby Borough Isolation Authorities for cases of Cerebro Spinal Fever.
- (d) Cases of Tuberculosis are dealt with by the County Council at the Dispensaries in Derby, Long Eaton, and Ilkeston, and the Sanatoria at Walton and Penmore.
- (e) The Shardlow Board of Guardians have just completed an up-to-date Infirmary to which cases not suitable for a general Hospital are sent, and also unmarried mothers.
- (f) The County Council have just opened Bretby Hall for children suffering from Tuberculosis of Joints and other orthopædic work.

#### Ambulance Facilities.

- (a) For Infectious Cases an ambulance is kept at the Draycott Isolation Hospital.
- (b) For Non-Infectious Cases: The Order of St. John and British Red Cross Society have ambulances stationed at Derby and Ilkeston. An excellent service is provided.
- (c) Small-pox cases are moved by the Long Eaton ambulance.

#### Clinics and Treatment Centres.

(1) Infant Welfare Centres are provided at

Spondon.

Sandiacre.

Draycott.

Melbourne.

Little Eaton.

- (2) School Clinics: Derby and Long Eaton.
- (3) Tuberculosis Dispensaries: Derby, Long Eaton, and Ilkeston.
  - 1, 2 and 3 are all provided by the County Council.
- (4) Venereal Diseases: Treatment is provided for at the Derbyshire Royal Infirmary.

#### Public Health Staff.

This consists of the Medical Officer of Health (part time), Sanitary Inspector (whole time), Building Surveyor (whole time). Four Health Visitors under the County Council Work in the District.

#### Professional Nursing in the Home.

- (1.) General. This is provided for by District Nurses, who are available in nearly all the parishes in the District.
- (2.) There is no provision for nursing infectious cases in the homes.

Midwives are available throughout the District (under the supervision of the County Council).

Chemical Work. This is carried out by arrangement with the County Analyst.

Bye-Laws, Adoptive Acts, &c.—Bye-Laws with respect to New Streets and Buildings are in force over the whole District. They have been revised and received the sanction of the Minister of Health on May 17th, 1924.

Urban Powers under Section 42 of the Public Health Act, 1875, are in force at Aston, Breaston, Draycott, Little Eaton, Littleover, Melbourne, Ockbrook, Normanton, Sandiacre, Spondon, Sawley, Stanley, Stanton-by-Dale, Chellaston, and Shardlow.

The Sanitary Provisions of the Public Health Acts (Amendment Act) 1907, have been in force over the District since August 16th, 1910, as follows:—

In force over Whole District—Sections 15-17, 20, 22, 23-25, 27-38, 43-46, 49, 50, 52-67.

Sections 21 in all Parishes, except Aston, Barrow, Breadsall, Chellaston, Dale Abbey, Risley, Stanton-by-Bridge, and Weston.

Sections 39-42 in Littleover, Melbourne, Normanton, Sandiacre, and Spondon only.

Section 22, P.H.A. (A) A., 1890, has been adopted for the Whole District.

#### Sanitary Circumstances of the Area.

Water.—The Table on page 32 shows the Parishes having Public Water supplies and the extent to which the parish concerned avails itself of its supply.

The remaining parishes depend upon supplies from wells, mainly shallow.

During the year the Council determined upon a scheme for supplying the following parishes from the Derwent Valley Water Board whose main passes through the District.

Ockbrook and Borrowash, Breaston (where at present the supply is only available for the Council Houses), Draycott, Elvaston, Shardlow, Aston-on-Trent and Chellaston. The supply is to be maintained by a Reservoir situated at the highest point in the Parish of Ockbrook.

The scheme originally included the Parish of Sawley. As, however, the Long Eaton water main passes through this parish, it was found to be more economical to make arrangements with the Long Eaton authority to supply this parish. This is to be done.

Table on page 32 gives full details of the houses with public water supply in the separate parishes where a supply is available.

Rivers and Streams.—There is no serious pollution of rivers or streams in the District.

#### Drainage and Sewerage.—

Sewerage and Sewage Disposal.—Modern systems of Sewerage and Sewage Disposal are in operation at Breaston, Draycott, Little Eaton, Melbourne, Ockbrook and Borrowash, Sandiacre, Spondon, Stanley Village, Stanley Common and Stanton-by-Dale. The sewers at Littleover and Normanton discharge into the Derby main sewers, and the Sawley sewage is pumped to the New Sawley sewage disposal works by arrangement with the Long Eaton U.D.C.

A scheme of Sewerage and Sewage Disposal is in hand for the Parish of Chaddesden. The Engineers' estimate is £9,070, and the proposed site is situated off Meadow Lane, on the "N" side of the canal.

The sewage of the remaining Parishes in the District is disposed of by means of tanks and sewage outfall ditches, which are cleaned out periodically. During the year special attention was given to the sewage outfalls at Aston-on-Trent, Arleston & Sinfin, Barrow-on-Trent, Elvaston, Shardlow, Sinfin Moor, West Hallam and Weston-on-Trent.

Sewer extensions were carried out at Littleover, Ockbrook and Sandiacre in order to cope with building operations, and further extensions are in hand at Normanton, Stanley and Stanton-by-Dale. Defective sewers were re-laid in Dale Road, Stanton-by-Dale and London Road, Shardlow.

The Breaston and Draycott sewage effluent course was cleaned out down to the Trent at Sawley. The Eaton Bank sewage outfall at Little Eaton has been altered and improved. The Sawley engines and pumps have been overhauled and repaired. New sprinklers were provided at the Spondon sewage disposal works.

18 samples of sewage effluents were taken from the various sewage disposal works in the District by the County Council, and of these 10 were "Good," 5 were "satisfactory," and 3 were "Bad." Steps were at once taken to improve the "Bad" effluents, with satisfactory results.

#### Closet Accommodation.

Full details are given in Table on page 30, indicating the number of water closets, pail closets, and privy middens in each parish. The new water scheme will greatly assist improvements in accommodation in the parishes concerned.

#### **Scavenging** (see Table, page 31).

Public Scavenging is in operation in 15 Parishes, which is the same as in 1924. This is  $85 \cdot 37 \%$  of the whole District and includes all Parishes having 200 houses and over; with the exception of West Hallam. A private arrangement has been made in this Parish whereby householders can have their house refuse collected at a small charge. Tenders have been invited for the Public Scavenging of Chaddesden and Weston-on-Trent, but so far without any result.

The total cost for 1925 was approximately £106 more than for 1924, but the average cost per house was reduced by 1/6, owing to the increased number of houses.

All the Parishes show a decrease in cost, with the exception of Chellaston, Draycott, Melbourne, Ockbrook, Shardlow and Spondon. The increase in cost was considerable for Chellaston, and was principally due to the purchase of a new sanitary cart. Aston-on-Trent and Stanton-by-Dale showed a substantial decrease in cost.

Generally speaking, the work throughout the District was carried out in a satisfactory manner, there being an improvement at Little-over. The complaints received related chiefly to house refuse and investigation proved a number of them to be of a trivial nature. In every case where the Contractors' attention was called to complaints, my instructions were complied with.

The house refuse is satisfactorily disposed of by tipping, a number of the Parishes owning or renting their own tips, and in the remaining Parishes the Contractors have to make their own arrangements. The nightsoil is disposed of by the Contractors on arable land.

The provision of Refuse Destructors at Sandiacre and Littleover was considered, owing to the Contractors having difficulty in finding tips. Various types of Destructors were visited and information obtained, but as the Contractors were finally able to provide more adequate tips, the question of Destructors remains in abeyance. It may, however, have to be revived in the near future.—F.G.F.

#### Sanitary Inspection of the Area.

Full details are given on pages 28 and 29.

**Schools.**—The sanitary condition of the schools is on the whole good throughout the District.

Considerable improvements have been made at the Sawley, Church of England, and the Shardlow schools as the result of representations by the Council as to their unsatisfactory condition.

Aston-on-Trent school is now under the County Council, and the necessary improvements are to be put in hand.

It has not been found necessary to close any of the schools during the year owing to infectious disease.

#### Housing.

#### (1) General Housing Conditions in the Area.

Page 31A gives the number of houses in each parish, together with the numbers inspected and dealt with under the Housing Acts. and indicates fairly accurately the general conditions.

There is still a shortage of houses in the district.

In 1922 a scheme for 228 houses was completed by the Council in the following parishes:

Aston-on-Trent ... ... 10
Breaston ... ... 66

Aston-on-Trent	• • •	• • •		10
Breaston	• • •	• • •	• • •	66
Chellaston	• • •	• • •		22
Little Eaton	• • •	• • •	• • •	16
Melbourne .	• •	• • •	• • •	40
Sandiacre	• • •	• • •	• • •	110
Shardlow	• • •	• • •	• • •	10
Spondon	• • •	• • •	• • •	26
West Hallam		• • •	• • •	18
Weston-on-Trent	•	• • •	• • •	10
. 0 4:	Total	• • •	• • •	228

In addition the Borough of Derby erected 226 in Normanton.

The Council have a further scheme for 75 houses in the following parishes:—

Spondon	• • •	• • •	• • •	• • •	30
Sawley	• • •	•••	• • •	• • •	10
Littleover	• • •	• • •	• • •	• • •	20
Normanton	•				15

The Derby Borough have erected a further 52 at Normanton.

#### 11.—Overcrowding.

This is still very considerable, and is due largely to the British Celanese Works which was established at Spondon (though actually in the Borough of Derby) in 1916.

A large number of hands, both male and female, is employed at these works.

It is very difficult under present conditions to deal with cases coming under notice as alternative accommodation is not available.

The condition has been eased by the Council Housing Schemes, and by private enterprise. Considerable advantage has been and is being taken of the Housing Subsidy in the District. (See Tables).

#### III.—Fitness of Houses.

(1) The general standard is fair. The defects most commonly found are dampness, defects in roofs, spouting, floors, and yard paving.

Defects are mainly due to lack of management and supervision by the owners.

- (2) The actions taken in regard to unfit houses are shown in Table on page 31A.
- (3) No great difficulty is experienced in getting the defects remedied.
- (4) The destruction and disposal of refuse is greatly hampered by the indifference on the part of tenants in aiding the Authority by the burning or burying of refuse.

IV.—Unhealthy Areas.
No complaints and representations have been made.
V.—Byelaws relating to Houses Let in Lodgings, Tents, Vans, Sheds, etc.
None.
VI.—A pamphlet dealing with the disposal of household refuse is issued by the Council.
Housing Statistics for the Year 1925.

(5) Number of dwelling-houses demolished in pursuance of Demolition Orders 6

(Voluntarily)

#### Inspection and Supervision of Food.

#### (a) Milk Supply.

A large proportion of the milk produced and supplied in the District is dealt with by the Co-operative Societies and the United Daries, who pasteurise the milk before delivery.

The County Council deal with tuberculous cattle and milk.

No licenses have been applied for under the Special Designations Order, 1923.

(b) **Meat.** Meat inspection is carried out by the Sanitary Inspector. Notices are sent weekly by the butchers giving notice of slaughter.

Any diseased meat discovered after slaughter is destroyed on the premises by the Inspector.

There are no public slaughter-houses in the District.

Private Slaughterhouses:

			In 1920. In	Jan., 1925. I	n Dec. 1925
Registered				31	30
License	• • •	• • •			
. f * ·					
; i				31	30

The sanitary condition of the bakehouses is satisfactory. No manufacture of food is carried on in the District.

There have been no cases of food poisoning.

# Prevalence of, and Control over, Infectious Diseases.

#### Infectious Diseases Generally.

During the period 1921—1925 (inclusive), the prevalence of infectious disease in the district has been fairly constant and distributed generally throughout the various parishes.

Full particulars showing the parishes affected with age groups and particulars as to removal to Hospital are given in the tables.

No cases of Malaria, Trench Fever, or Dysentery have been notified.

No special provision for dealing with cases of Pneumonia are available in the District; the majority of cases are treated at home, and in many cases the assistance of the District Nurse is available. A few cases only are removed to Hospital.

In cases of Diphtheria, antitoxin is supplied free of cost to the Medical Practitioners, and can be obtained through the local chemist. In the majority of cases it is administered on the arrival of the patient at the Isolation Hospital.

Contact cases are swabbed, and any carrier case discovered is isolated at home.

A special report as to the number of return cases and value of removal to hospital in cases of Scarlet Fever was sent to the Ministry.

There is no doubt that more return cases occur when the Hospital is very full than when it is moderately full.

Two epidemics of Small-pox have occurred: one in 1923-24 in Stanton-by-Dale and Sandiacre, which was associated with the outbreak in Ilkeston; and one in 1925, in Normanton, which was associated with the outbreak in Derby. Vaccination of contacts was carried out by the Public Vaccinator (when consent could be obtained) who was notified of the cases.

Reports of infectious diseases are made by the Head Teachers of the schools, and special visits are made to the infected schools.

- (1) A very efficient Bacteriological Laboratory is established at the County Offices, St. Mary's Gate, Derby, by which Practitioners are enabled to obtain, for their patients, the benefit of all the modern methods of diagnosis and treatment which Bacteriology provides. This is particularly of advantage in cases of Diphtheria, Tuberculosis, Enteric Fever, Meningitis, and Venereal Diseases. No fees are charged for routine cases.
- (2) Antitoxin is supplied free to Medical Practitioners for the treatment of Diphtheria. The Antitoxin is stocked by the Chemists in various parts of the District, so that no delay need occur in the Doctor's obtaining the same.
- (3) Disinfectants are supplied to persons unable to provide them.

All infected houses are visited on receipt of the notification, either by the Medical Officer or Inspector, or both. Arrangements are made for the patient's removal to Draycott Hospital, when it is desirable. If the patient is isolated at home, printed instructions are given on the best management of the case and method of isolation. Post cards are left at all infected houses, to be returned to me when the house is ready for disinfection, and the work is then carried out under the supervision of the Inspector. When it appears necessary other visits are paid, to see that the instructions are being obeyed. When patients are removed to Hospital, the premises are usually disinfected on the same day.

All disinfecting is done with Formalin Lamps and Sprayer.

#### Notifiable Diseases (other than Tuberculosis) during the year 1925.

#### Public Health (Prevention of Tuberculosis) Regulations, 1925.

No case of Tuberculosis amongst employees in the milk trade were notified.

#### Public Health Act, 1925, Sec. 62.

No difficulty was experienced in any case where removal to Hospital was required.

#### Non-Notifiable Diseases.

Six deaths occurred from Whooping-cough and 5 deaths from Influenza.

There were no deaths from Diarrhæa, etc, of children under 2 years of age.

Three deaths occurred from Measles.

Measles is not notifiable in the District. Information as to outbreaks is obtained from the reports of school teachers. It is only through the schools that there is any possibility of controlling an epidemic. Mothers, however, cannot be convinced of the infectivity of the disease before the appearance of the rash. In the majority of cases, however, even if this can be done, isolation of contacts is most difficult.

No case of Poliomyelitis was notified.

Two cases of Puerperal Fever were notified. There were no deaths.

#### Ophthalmia Recnatorum.

Caso	⊅S.

#### CANAL BOATS ACTS.

#### Annual Report for Year ended December 31st, 1925.

To the Chairman and Members of the Shardlow Rural District Council.

GENTLEMEN,

I herewith beg to submit to you my Annual Report for the Year ended December 31st, 1925, as required by Section 3 of the Canal Boats Act, 1884.

9 Boats were inspected, which were registered for 32 persons, and occupied by 11 men, 3 women, and 5 children, two of the latter were of school age.

No cases of overcrowding and non-separation of the sexes were observed.

No infringements of the Acts were found and the general appearance of the Boats and the Health of the occupants were satisfactory. No cases of infectious disease occurred.

I am, Gentlemen,

Your obedient Servant,

F. G. FORMAN,

Inspector of Canal Boats.

January 14th, 1926.
